Metallopoduktsia is a high-tech innovative company focusing on design and manufacturing of automotive accessories and original automobile equipment.

Our company possesses a high-tech innovative production basis equipped with modern machinery for metal working. New technologies are constantly implemented into manufacturing process; company's quality management system is certified according to ISO 9001:2008.

Our engineers have unique experience in designing and manufacturing of metal and plastic constructions what enables us to create skid plates satisfying any technical, ecological and operational requirements. Experience received in cooperation with car manufacturers' engineers (genuine accessories) enables to design products conforming all technical and safety requirements.

Key factors like: powerful modern production base, new technologies in production process, effective quality management system and unique engineering experience ensure satisfaction of our customers' need for wide range of quality accessories and original automobile equipment.

Our main products and services are:

- skid plates SHERIFF;
- skid plates, bumpers, winch holders and other accessories for ATVs, brand STORM;
- individual exclusive skid plate designing;
- roof rack systems Atlant;
- tow bars;
- car mats and trunk (cargo) liners.

SHERIFF skid plate is a metal casing that protects most important elements and components, located in the under carriage of your vehicle . It is an essential accessory for every vehicle as it allows to

- protect engine mechanisms and electric wiring from dust and mud;
- protect engine bay mechanisms from damage and body elements from deformation
- improve aerodynamic characteristics of your car (like an "under engine cowl panel");

- reduce fuel consumption;
- avert any possible noise or vibration during driving thanks to special rubber spacers which prevent contact with car body;
- carry out service of your vehicle without any hindrance due to technological apertures for oil drain and replacement of oil filter;
- preserve suspension members of the vehicle in initial condition as installation is carried out only on regular apertures in the car body (without any drilling) with corrosion resistant fasteners and bolts.

High quality of our products was successfully approved by:
- fitting test;
- 480 hours salt spray test;
- complete painting test made by FondMetal (chemical resistance test, pencil method etc.;]
- powertrain cooling (heating) test
- NVH (noise, rattle and squeak) test
- 60 km/h speed real crash test
- perpendicular frontal (FP2) 50kph crash test simulation

At the moment Metalloproduktsia LLC offers more that 1700 serially produced models of skid plates to satisfy every customer's needs. We do not use universal approach to new products designing. Designing of skid plates depends on the vehicle's body type, engine volume, modification. All these issuers are taken into consideration by our engineers to secure perfect fitting and operational performance of "SHERIFF" skid plates. Our skid plates are homologated and recommended by biggest car manufactures.
